

5 years of sharing My experience with the BioHorizon

Liliia Kalachniuk

National University of Life and Environmental Sciences of Ukraine

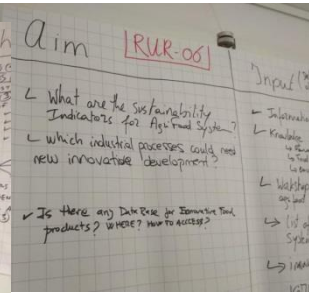

BioHorizon's Final Conference

21/11/2019, Brussels

Sharing is FUN!

During “BioHorizon interactive training. Opportunity for the Proposers in the H2020 SC2 Work Program” (2.07.2019), small groups of participants formed the main points of H2020 applications, following the recommendations of the BioHorizon leaders **Bozena Podlaska, Saske Hoving and Matteo Sabini**.

The BENEFITS of sharing

During the “BioHorizon SC2 and KET-B Brokerage Event” (3.07.2019) some useful recommendations for the formulation of H2020 competitive proposals were presented in the form of reports by event organizers; flash-presentations were presented simultaneously in **three sections**: Sustainable Food Security (1), Rural Renaissance + Blue Growth (2), Food & Natural Resources + KET-Biotech (3), and Liliia Kalachniuk participated in 10 bilateral meetings together with future potential coordinators or partners of H2020 proposals, who represented various universities, private companies, and EU NCPs.

Together we can do MORE!

*It wasn't worth participating in any activities of the BioHorizon project.
The most important thing that the BioHorizon project gave me is more selected information about calls, potential partners and examples of success-story in the "Bio"-direction.*

Network projects should be continued in Horizon EU !

T – together
E – everyone
A – achieves
M – more
