CERTIFICATE

This certifies that

Tamara Lytvynenko

has successfully completed the course

Animal welfare and meat science

Course time: May 2024

30 Hours of Participation (1 ECTS)

Course Aim:

Stress induces various physiological and biochemical changes in the animal body. The aim of the course was to provide understanding of relationship between animal welfare and meat quality, explain the mechanism behind this and suggest solutions.

The course is a part of the project project LEARNSAVE (Learning under attacks — sustainable education at risk in Ukrainian universities), supported by Swedish Institute (Svenska Institutet, project 01236/2023).

Learning outcomes:

Identify the relationship of animal welfare in relation to meat defect
Explain impact of long- and short-term stress on meat quality
Discuss other meat defects
Explain the reasons and principles of immunocastration
