## Standards and certification schemes that take into account the concept of sustainable horticulture

### Organic product

### Ethical and sustainable supply chains

<https://www.sedex.com/>

### Sustainable development, animal welfare, health and social responsibility

<https://www.krav.se/en/standards/>

## Product certification schemes

### Religious certification

## Requirements for Plant Production

The general requirements for organic plant production are:

- Use of primarily renewable and on-site resources;
- Use of technologies that do not harm human health, plants, or animal welfare, and that prevent or minimize environmental pollution;
- Use of primarily agrotechnical, biological, mechanical, and physical methods for plant protection, taking into account appropriate crop rotations, as well as by selecting appropriate species and varieties resistant to pests and diseases;
- Use of methods during plant cultivation and treatment that optimize soil biological activity, ensuring balanced nutrient supply to plants, including the use of living microorganisms;
- Use of soil-protecting technologies for plant cultivation that prevent the occurrence of erosion or other degradation processes in the soil;
- Use of organic seeds and planting material for sowing;
- Completion of a conversion period, the duration of which for land plots for the cultivation of annual crops cannot be less than 24 months before sowing, and for perennial crops (excluding fodder) cannot be less than 36 months before the first harvest of organic products.

The following is prohibited in the organic production process:

- GMOs and products produced from or with the use of GMOs;
- Synthetic substances, including agrochemicals, pesticides, growth regulators, and hydroponic production methods;
- Parallel production (organic and non-organic production by the same operator of the same product).

# PROGRESS

Promoting Green Deal Readiness in the Eastern Partnership Countries

## 5 STEPS TO OBTAINING THE RIGHT TO CONDUCT CERTIFICATION OF PRODUCTION AND/OR CIRCULATION OF ORGANIC PRODUCTS

Get acquainted with the legislative requirements for production, circulation, or labeling of organic products by certification bodies

Develop and implement an action plan for preparation for accreditation

Conduct an internal assessment of compliance with these requirements

Be entered into the Register of Certification Bodies

Pass accreditation in accordance with the Law of Ukraine "On Accreditation of Conformity Assessment Bodies" in the sphere of organic production and/or product circulation in one or several sectors

### Duties of the Certification Body:

- Comply with legislative requirements in the sphere of organic production, circulation, and labeling of organic products
- Provide information about operators as prescribed by legislation
- Interact with the State Production and Consumer Service on matters of state control (supervision) upon detecting legislative violations by certified operators
- Facilitate the work of state inspectors conducting state control of the certification body
- Conduct annual certification of operators
- Keep copies of certificates and reasoned decisions on issuing or refusing to issue a certificate for five years from their issue date
- Exchange information with other certification bodies regarding operators for the purpose of properly performing certification duties

### Rights of the Certification Body:

- Require documents necessary for certification from the operator
- Make decisions on organic certification or refusal of such certification
- Issue and cancel certificates, temporarily suspend certificates in accordance with legislation
- Grant consent to the operator to apply exceptions from organic production requirements
- Based on the results of the first inspection, determine the start date of the conversion period (if such a period applies)
- Select samples of soil or materials, seeds and planting material, feed, products, water for conducting tests in an accredited laboratory
- Grant consent to the operator to entrust a third party with providing separate services (performing work), including contracting (subcontracting), necessary for organic production and/or circulation of organic products, subject to inspection of these facilities

## Directory of national organic exporters

2026

### AGRO ORGANIC

LLC

Agro Organic was established in 2016. The company is a vertically integrated production and processing company that grows raspberries, alpine strawberries and sea buckthorn on the area of over 80 hectares and has a freezing facility with the ability to simultaneously store 1,500 tonnes of frozen products.

The available optical sorting technologies, certification according to HACCP and ISO quality standards make it possible to ensure class A and class B standards for frozen berries in accordance with the customer's specifications.

### ALTE FOODS

A-L-T-E  
F-O-O-D-S

LLC

ALTE FOODS is a new ambitious and powerful producer of IQF products with a brand-new production facility in Ukraine. We apply IQF technology to keep the nutritional value of the raw materials, unprecedented foreign material detection with the new cutting-edge SORTEX PolarVision detection system from Bühler AG to detect all types of foreign materials in frozen fruit and vegetables, and optic sorting system to obtain the top quality products.

The company is focused on the long-term cooperation with Ukrainian suppliers of quality raw materials and partnerships with customers in Ukraine and the EU, as well as all around the world.

### Get familiar with the certification programs – version 2020

Choose your field of activity below to view related certification programs.

- All fields of application
- BI - Production of grain and legume crops
- CI - Processing of fast-moving consumer goods
- E - Catering
- I - Production of food packaging
- JII - Hygiene design (food businesses)
- Livestock intelligence - breeding of animals for meat / milk / eggs / honey
- BIII - Primary processing of plant products
- CIII - Processing of fast-moving consumer goods for animal and plant feed (compound products)
- FI - Wholesale / Retail Trade
- K - Production (bio)chemicals and bio-cultures used as food ingredients or auxiliary substances for food processing
- All - Fish and seafood production
- CO - Primary conversion of animals
- CIV - Processing of animal and plant products under conditions that preserve a stable environment (mixed products)
- FII - Food brokerage / agent
- H - Provision of food safety services
- BI - Plant production (except grain and legume crops)
- CI - Processing of fast-moving consumer goods of animal origin
- D - Feed production
- G - Provision of storage and distribution services
- CB - Hygienic design (equipment and building suppliers)

<http://www.mygfsi.com/>

A screenshot of the GFSI website. The top navigation bar includes links for "WHO WE ARE", "WHAT WE DO", "HOW TO IMPLEMENT", "EVENTS", "LIBRARY", "CONTACT", and a blue "GET INVOLVED" button. The main content area displays five certification schemes in a grid:

- CANADAGAP**: Logo with a red maple leaf, text "CANADAGAP" and "CanadaGAP" below.
- Freshcare**: Logo with a green and yellow leaf, text "Freshcare" and "Freshcare" below.
- GLOBALG.A.P.**: Logo with a green circular emblem, text "GLOBALG.A.P." and "GLOBALG.A.P." below.
- primus GFS**: Logo with a blue circle and "primus GFS" text, text "PrimusGFS Standard" below.
- SQF INSTITUTE**: Logo with a blue globe and "SQF INSTITUTE" text, text "SQF" below.

## What topics does IFA cover for fruits and vegetables?

IFA for fruits and vegetables covers the key aspects of primary production, from field activities to post-harvest processing. The standard was developed in collaboration with global experts and underwent extensive public consultations as part of our [standards development process](#). This ensures that IFA remains reliable, practical and cost-effective for producers, while meeting the ongoing needs of buyers.

The main IFA topics for fruits and vegetables include:

- Traceability
- Food safety
- Health, safety and welfare of workers
- Biodiversity and conservation
- Energy efficiency
- Waste management
- Good agricultural practices
- Water management
- Integrated pest management
- Plant protection

Additional Modules

If you need assistance, you can contact us [here](#).

#### Step 1:

Download the Global Standard and guidance interpretation from the [Bookshop](#), which you will need when following the steps for achieving BRCGS certification.

Download

#### Step 2:

Our pre-sales support team is ready to help you if you need assistance or recommendations, regardless of whether it's related to site navigation or if you need additional information.

Contacts

#### Step 3:

Learn about the scope of application, standard requirements, and the auditor's perspective by attending training in a format suitable for you and your team.

Training

#### Step 4:

Download the self-assessment tool from our ["Help and Guidance"](#) page and evaluate your activity according to the Standard requirements to prepare for the certification audit.

Help and Guidance

#### Step 5:

Select a certification body from the register, registered with BRCGS, to conduct an audit of your activity and register you as a BRCGS-certified site.

### How to Access the API Service

API – an exclusive add-on for Directory Pro accounts. A subscription to Directory Pro is required before purchase.

The API is offered on a self-implementation basis, and after purchasing through the BRCS store, you will gain access to the API developer platform, which contains everything needed for configuration and integration.

The API service is available in two tiers. Purchase the tier that matches your Directory Pro subscription and limit of favorite sites. API integration includes data only for sites marked as favorites.

**Citing**  
Commercial (for Directory Pro levels 1-3) – £499.00

Enterprise (for Tier 4 Directory Pro) – £1049.00
