

Second awareness raising seminar in Ukraine took place on June 5, 2026, within the framework of the IV International Scientific and Practical Conference "Digital Technologies in Power Engineering and Automation", organized by the Educational and Scientific Institute of Power Engineering, Automation and Energy Saving together with leading scientific institutions of the National Academy of Sciences of Ukraine.

The seminar was held in a mixed format and brought together more than 35 specialists from both research and educational institutions and business representatives.

Nina Nikolova from The Chamber of Installation Specialists in Bulgaria and Padraig Lyons from the National University of Ireland, Cork, who, together with Ukrainian colleagues, presented the report "Training of specialists for home renovation one-stop-shops"

Professor of the National University "Poltava Polytechnic named after Yuriy Kondratyuk, Anatoliy Kolienko delivered a report «The impact of climate change on the volumes of heat consumption for heating buildings and associated greenhouse gas emissions».

The report of Inna BILOUS, Associate Professor of the National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute" "Energy efficient operation modes of the ventilation system of a residential building" aroused great interest.

Vladyslav TKACHENKO - a specialist at the Center for Efficient Energy Use - delivered a report "The influence of ex- and infiltration of building enclosures on its energy performance"

It should be noted that all these speakers became active participants in the national training of specialists for home renovation In a "One-Stop Shop" package

Overall, the seminar was fruitful, and the results of the discussions and presentations will certainly contribute to the further development of innovations in the field of building reconstruction.
