

GUIDE FOR AUTHORS

General information

The journal “Ukrainian journal of veterinary sciences” is included in the List of scientific professional editions of Ukraine, category “B” (approved by the order of the Ministry of Education and Science of Ukraine from December 28, 2019, № 1643), which can publish the results of dissertations for obtaining the degree of Doctor of Sciences, Candidate of Sciences and Doctor of Philosophy in the field of knowledge 21 “Veterinary Medicine” by the specialties 211 “Veterinary Medicine” and 212 “Veterinary Hygiene, Sanitation and Examination”.

Frequency: 4 times a year.

The journal “Ukrainian Journal of Veterinary Sciences” is indexed in international scientometric databases: Index Copernicus, Google Scholar, Ulrichsweb, EBSCO, MIAR, BASE. The archives of the journal are also available on the website of the National Library of Ukraine named after V. I. Vernadsky.

The language of the publication is English.

Since № 3 2020, articles are accepted for consideration by the editorial board in English only.

Editorial policy regarding publications

- The scientific journal accepts original scientific articles of problematic and methodological nature, which cover the results of scientific researches with statistical data processing, that have theoretical and practical significance, relevant to veterinary medicine, and have not been published before.

- The authors are responsible for the originality (plagiarism) of the text of the scientific article, the accuracy of the facts, citations, statistics, proper names, geographical names, and other information, as well as for the fact that the materials do not contain data that are not subject to open publication.

- The authors give their consent to the collection and processing of personal data in order to include them in the database in accordance with the Law of Ukraine № 2297-VI “On Protection of Personal Data” from 01/06/2010. The journal guarantees that personal data, except those publicly submitted in the article, will be used exclusively for internal tasks of the editorial board and will not be distributed and transferred to third parties.

- Authors who obtain the degree of Doctor of Philosophy (Candidate of Sciences) must indicate their supervisor.

Procedure for submitting a scientific article

1. An **electronic** package of documents is sent to the editorial board of the scientific journal through the **OJS system** (<http://journals.nubip.edu.ua/index.php/sanu/index>):

- information about the authors (Vidomosti_Ivanenko.doc), *Annex 1*;
 - agreement on publication, transfer of copyright and adherence to publication ethics (Agreement_Ivanenko.doc);
 - scientific article (Paper_Ivanenko.doc), *Annex 2*;
 - extended abstract of the article in Ukrainian up to 1800 characters (Abstract_Ivanenko.doc).
- to check the translation quality of the article in English, it is necessary to send its Ukrainian version.

2. The authors will be sent a message of relevant content by e-mail after receiving and reviewing the scientific article by the editorial board.

3. The editorial board make final decision on publication and also reserves the right to further review, editing and rejection the scientific article.

4. The editorial board does not consider materials that do not comply the requirements for the submission and design of a scientific article.

Article review procedure

1. Review of the article manuscript is carried out to determine the quality and reliability of its scientific material, to maintain a high scientific and theoretical level of the journal and to select the most relevant scientific papers.

2. The journal uses double-blind (anonymous) review:

- the personal data of the author (author's team) is not disclosed to the reviewer;
- the author (authors) are not provided with the personal data of the reviewer.

3. All scientific articles undergo a primary examination in the correctness of their design and compliance with the "Requirements for manuscripts" established by the editorial board.

4. The primary expert evaluation of a scientific article is carried out by the editorial board.

5. Further, the bureau of the editorial board determines for the article a reviewer from among the members of the editorial board or an authoritative scientist in the relevant scientific field:

- reviewers should be well-known experts in the field of the submitted manuscript and have publications in this field of research (preferably for the last 5 years).

6. After expert evaluation of the scientific article, the reviewer may:

- recommend the article for publication;
- recommend the article for publication after its revision by the author, taking into account the comments and suggestions made;
- do not recommend the article for publication indicating the reason.

The editors recommend that reviewers use a standard form of review developed by the editorial board when reviewing articles.

7. The editors send the authors copies of reviews that do not contain information about the reviewer, or a reasoned refusal to publish a specific manuscript of the article.

8. After consideration of the scientific article by the editorial board and making a positive decision on its publication, the authors will be sent a message to the e-mail address with an enclosed receipt.

9. The editorial board reserves the right for additional reviewing, editing and rejection of scientific articles.

Materials prepared without complying with the requirements for the submission and design of scientific articles, the editorial board does not consider!

Requirements for the design of a scientific article

1. Scientific articles accepted for consideration must be from 10 pages of text, paper format – A4, page orientation – portrait, margins on all sides – 20 mm, line spacing – single, font size – 11, typeface – Times New Roman, paragraph indent – 1 cm.

2. The structure of a scientific article:

- UDC (alignment on the left edge, bold font). You can determine the UDC code by following this link:

[http://www.udcsummary.info/php/index.php?lang=uk&pr=Y;](http://www.udcsummary.info/php/index.php?lang=uk&pr=Y)

- **Article title** (in English, centered, bold, capital letters). Must concisely inform about its content (up to 12 words) and be interesting for scientists and professionals;

- **Author's surname and initials** (in English, centered, bold font); academic degree, position, name of the department or place of work;

- **ORCID** for each of the authors of the article;

- *Official name of the organization, city, state (in English, centered, italics);*

- *E-mail.*

Abstract. The volume of the abstract is 220–250 words. It should be concise, without unnecessary words, reflect the main content of the article, structured and written in high-quality English (*font size – 11, italics, line spacing – single*). Compositionally, the abstract can be built on the principle of IMRAD (Introduction, Methods, Results and Discussion): 1–2 sentences about the relevance of the research problem; a brief description of research methods; main results (specific facts); specific conclusions and prospects for further research (1 sentence). The content of the annotation should be clear without reading the main text of the article. It is necessary to use an Active Voice, not a Passive (“The study tested”, not “It was tested in this study”).

Keywords: 4–6 words (phrases) that reflect the content of the article (*font size – 11, italics, line spacing – single*)

The abstract in Ukrainian and English should be identical in content and design.

Requirements for the presentation of the main sections of the article:

Relevance (Introduction) should reflect the relevance of the scientific problem with the citation of facts known in the world literature with an indication of still unresolved aspects of the issue.

Analysis of recent researches and publications. It is desirable to analyze the scientific facts from foreign and domestic English-language publications for the last 5 years. References to literary sources in the text of a scientific article should be given in parentheses as follows: (Surname, year), for example one author – (Putchkov, 2013), two authors – (Peter & Prince, 2018), three or more authors – (Lonappan et al., 2016; Lu et al., 2017; Sarkar et al., 2017). In the end, the main task of scientific research is briefly formulated in the form of **Purpose** or hypothesis of the article.

Materials and methods of research – describes in detail the study scheme, conditions, and location of the experiment, animal selection criteria, basic research methods and techniques (with reference to the original source), reagents and devices (the firm, model, and country of manufacture are specified), compliance with the European Convention for the Protection of Vertebrate Animals used for Experimental and other Scientific Purposes. This section should contain the most comprehensive information for further possible reproduction of the published results. Finally, information on methods of statistical data processing is provided.

Results of the research and their discussion – the obtained results of research and their analysis with the given comparison concerning the known facts (it is desirable for the last 5 years) are noted. The requirements for this section are general, as for all international scientific journals.

Tables and figures by volume should not exceed 30% of the text. Images must be available for editing. References to a table or figure should not be given as a single sentence.

Conclusions and future perspectives. It is necessary to present specific results of the analysis (preferably as a single paragraph up to 10 sentences) and prospects for further research.

Acknowledgments (if necessary!) Are given after the conclusions before the bibliographic references.

References (list of used sources) is given at the end of the scientific article, at least 20 sources, preferably foreign and domestic English-language and for the last 5 years, in alphabetical order (font size – 11, line spacing – single), without numbering, in English (with transliteration in the case of Ukrainian or Russian titles), which is formed according to the international standard APA (American Psychological Association) style (for placement of manuscripts in international databases). To facilitate the work on the design of sources according to this standard, it is recommended to use the link <https://slovnyk.ua/translit.php>. Transliteration of Ukrainian symbols must be carried out in accordance with the Resolution of the Cabinet of Ministers from January 27, 2010, № 55, and Russian – according to the BGN/PCGN system.

Tables and figures can only be in portrait page orientation in appropriate amount. The table must have a serial number, indicated on the left before the table title. The title of the table is given above the table (font size – 11, bold, line spacing – single, width placement). The text of the table is given by the Times New Roman typeface (font size – 11, line spacing – single).

1. The title of the table

Sowing period	Seedlings		Flowering		Yield cwt/ha
	infected plants	development of the disease	infected plants	development of the disease	
The first decade of April	45.0	14.8	89.0	40.3	27.2

The figures might be a single graphic object and grouped; have a number and title indicated outside the object (font size – 11, bold, line spacing – single, width placement). The location of the figure should be in the text. Images should be contrasting, black and white, or color. Graphic materials should not be scanned.

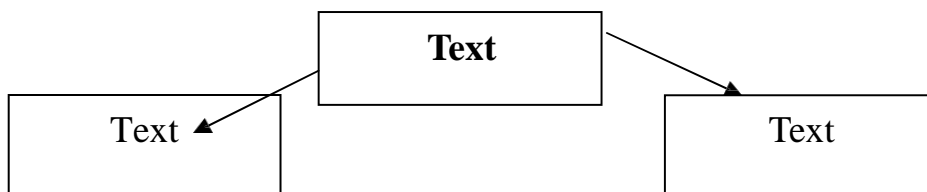

Fig. 1. The title of the figure

The author’s postal address: name of the organization, street and house, city and postal code, country. Phone: + 38-xxx-xxx-xx-xx.

Payment for publication of articles

- The cost of publishing an article and providing a digital identifier DOI is a total of 1500 (UAH).

If you do not have the funds to pay for the publication, you can request a waiver. We do not want the fee to become an obstacle to the publication of quality scientific papers.
