Bayer Fellowship 2016: searching for talents!

2016-06-06

Dear Sir or Madam,

Supporting the pioneers of tomorrow – that is the goal of the Bayer fellowship programs. We support young international talents and their special studies or projects in the life sciences and medicine.

Our goal is to assist the next generation of researchers, physicians and teachers to develop their career opportunities as they engage in “Science for a Better Life”. We give international talents the chance to conduct study projects in Germany or talents from Germany, wishing to realize a project abroad.

The application period 2016/2017 is now open and international students from the following disciplines are invited to apply:

- Biology and molecular biology
- Biotechnology, bioengineering and bioinformatics
- Chemistry and biochemistry
- Human medicine, Veterinary medicine, public health
- Medical sciences and medical engineering
- Agricultural sciences and agronomy
- Crop protection, seeds and green biotechnology
- Environmental sciences and agricultural sustainability
- Science teachers in chemistry and biology

We offer **individual financial support** for students (up to PhD level) or young professionals who **intend to go abroad (or come from abroad to Germany)** for a **special study project**, e.g. a lab project or internship, a special study course, or the clinical phase of a traineeship as a physician.

Further selection criteria include **good study grades** and a **concrete project** with **detailed project plan** and a confirmation from the host institution at which the project shall be conducted.

We'd much appreciate if you encourage suitable candidates from your institution to apply for a Bayer fellowship.

The current application period ends on July 18, 2016.

Further information is available at:
