ABSTRACT. All metrics published in the *Journal Citation Reports™* are dependent on the complete and correct aggregation of citations to each journal title. Here, we explain how unique cited titles are used for Thomson Reuters indexing, and how variations and ambiguities in titles are collected in order to create the Journal Impact Factor numerator.

What is ResearcherID?
ResearcherID provides a solution to the author ambiguity problem within the scholarly research community. Each member is assigned a unique identifier to enable researchers to manage their publication lists, track their times cited counts and h-index, identify potential collaborators and avoid author misidentification. In addition, your ResearcherID information integrates with the *Web of Science* and is ORCID compliant, allowing you to claim and showcase your publications from a single one account. Search the registry to find collaborators, review publication lists and explore how research is used around the world!

What is ResearcherID?

ResearcherID provides a solution to the author ambiguity problem within the scholarly research community. Each member is assigned a unique identifier to enable researchers to manage their publication lists, track their times cited counts and h-index, identify potential collaborators and avoid author misidentification. In addition, your ResearcherID information integrates with the *Web of Science* and is ORCID compliant, allowing you to claim and showcase your publications from a single one account. Search the registry to find collaborators, review publication lists and explore how research is used around the world!

What is ResearcherID?

ResearcherID provides a solution to the author ambiguity problem within the scholarly research community. Each member is assigned a unique identifier to enable researchers to manage their publication lists, track their Times Cited counts and h-index, identify potential collaborators and avoid author misidentification. In addition, your ResearcherID information integrates with the Web of Science and is ORCID compliant, allowing you to claim and showcase your publications from a single one

ORCID

Did you know you can associate your ORCID ID with your ResearcherID account?

☒ I would like to create an ORCID record.

☐ I already have an ORCID record.

☐ No, thank you.

The Open Researcher and Contributor ID (ORCID, Inc.) is a non-profit organization that aims to solve the author/contributor name ambiguity problem in scholarly communication by creating a central registry of unique identifiers. These identifiers can be used within various systems you may interact with in your professional research workflow, including manuscript submission, etc.

By creating an ORCID you will be able to link your ResearcherID account with this centralized registry.

1. Для начала разрешите вашему Microsoft Excel использовать макросы. Это такая вот кнопка слева сверху:

2. Далее нам надо выгрузить данные по публикациям из Web of Science Core Collection, но в определённом формате. Проведите поиск по различным вариантам написания названия вашей организации в Web of Science Core Collection. На странице результатов поиска у вас будет кнопка сохранения результатов - выберите "Сохранить в файл другого формата"

3. Теперь выбираем записи для выгрузки (у нас есть ограничение на выгрузку до 500 публикаций, если в ваших результатах их оказалось больше, вы просто можете провести дополнительные выгрузки). Содержимое записи: выбираем "Полная запись", формат файла: "Обычный текст". Система сохранит вам текстовый файл, который вы можете открыть, выделить всё его содержимое (нажав Ctrl+A) и сохранить его в буфер обмена (нажав Ctrl+C)
