VISIT OF THE AGRONIXUA COMPANY

On 14 May, 2024 students of the educational courses "Mechatronics for building innovative potential of higher education" and "Innovative technologies in the design of biotechnological processes" got acquainted with products and technologies of AgronixUA.

As part of the visit, the leaders of drone production in Ukraine held a seminar on new opportunities for the use of drones both in agriculture and for the needs of the energy sector in the context of its accelerated transition to the use of alternative sources and “green technologies”.

ABOUT THE COMPANY

"AgronixUA" – is the official importer of agrodrones "DJI" AGRICULTURE in Ukraine (<https://agronix.com.ua/>).

The company has sold more than 50 big drones, and taught more than one hundred professional pilots on DJI drones.

The company is continuing to develop new areas, including the energy sphere.

ACTIVITY DURING THE VISIT

During the visit, the head of the company Mykola CHERNYAK, touched on the economic side of working with drones. It was considered and explained in detail and demonstrated in the presentation, which aroused the audience's curiosity. Then the class smoothly transitioned to an active phase of questions and discussion.

The company has also developed a special course for rapid training of pilots of DJI Agras agricultural drones and training of certified pilots. During study, students acquire all the necessary information about controlling a drone and learn to navigate a drone.

PLANS FOR THE FUTURE

The participants of the seminar were very interested in the technologies that the speaker spoke about.

Since the use of drones in alternative energy helps increase efficiency, reduce costs and minimize risks to human health and safety, the head of the company enthusiastically accepted the proposal to use the company drones to solve problems in the field of energy. We hope that this direction will also be actively developed in the company.
