

WHY DO WE NEED THE CENTER FOR THE RIGHTS OF THE CHILD?

According to the UN Convention on the Rights of the Child and the Family Code of Ukraine, a child is a human being below the age of eighteen years →

First and second-year students are CHILDREN

New opportunities for Social Pedagogy students to deepen knowledge and practice skills

New opportunities for student mobility

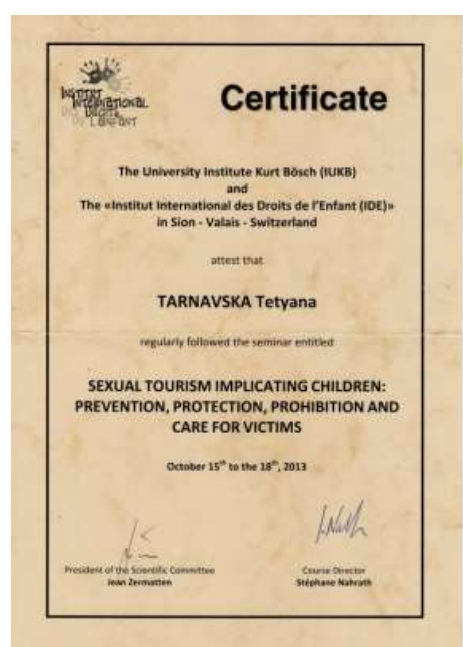

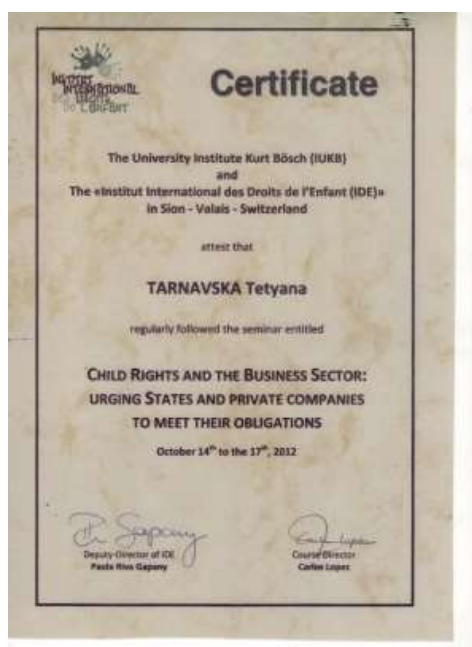

New opportunities for the faculty training and professional development in the world's best educational institutions and organizations whose activities are related to the protection of children's rights

Informational support of scientific research in the field of the children's rights; promotion of our researchers participation in the international events and joint research projects as well as the collaboration with international children's rights organizations

The children protection issues attracted attention of NULES of Ukraine faculty long before the creation of the Centre. Attending the International Institute for Child Rights (Sion, Switzerland) seminars “Child Rights and the Business Sector: Urging States and Private Companies to meet their Obligations” (2012) and “Sexual tourism implicating children: prevention, protection, interdiction and care for victims” (2013) was a great start and the best way to gain knowledge.

The IDE was established in May 1995 in Sion as a result of the collaboration of two partners: the International Association of Youth and Family Judges and Magistrates (IAYFJM) and the ex-University Institute Kurt Bösch (IUKB) in Sion/Bramois. In 2015, the IDE becomes 20!

The IDE's activity is based on two axes: providing professional training for those working with and for the children and raising awareness among the greater public and professionals as to the existence, content and exigencies of children's rights, such as defined by the Convention, its three additional protocols and other pertinent international treaties and documents. The IDE is also active in the field of research and works in a network on a global scale.

Learn more about the IDE [here](#).
