

On June 7, 2024, the II International Scientific and Practical Conference "DIGITAL TECHNOLOGIES IN ENERGY AND AUTOMATION" was held.

Nina Nikolova, Director of the Professional Training Center of the Chamber of Installers of Bulgaria, told at the joint meeting of the "Energy Efficiency Management of Technological Complexes" and "Heat Energy Systems" sections. She familiarized the audience with the first results of the LIFE project "**New Skills for Nearly Zero Energy Buildings**", the main goal of which is the development of new and adaptation of existing training methods and programs taking into account the needs of the labor market of specialists in the field of "smart buildings".

The team of the National Institute of Energy, Automation and Energy Saving NULES of Ukraine actively participates in the implementation of the tasks of this project, consisting of: Viktor Kaplun, Olena Shelimanova, Svitlana Makarevych, Yevhen Antipov, who were co-authors of the report.

In particular, **Olena Shelimanova** informed those present about the progress of the project, announced the next steps of its implementation and invited all those who wish to participate in the trainings foreseen by the project's tasks in the next year.
