

On June 7, 2024, the National Institute of Energy, Automation and Energy Saving, on the initiative of the National University of Bioresources and Nature Management of Ukraine, the Institute of General Energy of the National Academy of Sciences of Ukraine, with the support of the Digital Energy Cluster, held the Second International Scientific and Practical Conference "Digital Technologies in Energy and Automation".

Evelina Stoykova (Sofia Energy Centre, Bulgaria) made a report on "New technologies for PV Systems in Buildings" at the "Digital Energy and Polygeneration Systems" section. The presenters of the report were Nina Nikolova (Vocational Training Center Bulgaria Chamber of Installers in Bulgaria) and the team of the Institute of Energy, Automation and Energy Saving, consisting of: Viktor Kaplun, Olena Shelimanova and Svitlana Makarevych. All of them are performers of the tasks of the Project "Vocational Education and Training For Green and Smart Energy in Buildings", one of the tasks of which is the training of specialists in the field of photovoltaic and "smart" electrical systems in buildings.

The International conference is an excellent opportunity to provide information about the Project to a wide range of representatives of scientific and educational institutions in Ukraine and a number of European Countries.
